ARNOLD MUKWEVHO

mukwevhoarnold627@gmail.com 0692306278 in/arnold-mukwevho

SUMMARY

An aspiring Software/Data Engineer and young professional with a strong foundation in software development, cloud computing, and data engineering. Experienced in building scalable data pipelines on Google Cloud Platform and managing automated workflows. Proficient in Python, Java, and SQL, with a commitment to continuous learning and delivering high-quality, user-focused software.

EXPERIENCE

Cloud Data Engineer

JUTOMATE **March 2025 – March 2026**

- **Architected** and maintained scalable data pipelines on Google Cloud Platform, ensuring 99.9% data availability for cross-functional teams.
- **Automated** end-to-end ELT processes using Apache Airflow, reducing manual data migration time from PostgreSQL to BigQuery by implementing batch and Change Data Capture (CDC) methods.
- **Optimized** data accessibility by transforming raw datasets into structured formats via Dataflow (Apache Beam) and Cloud Functions for real-time analytical reporting.
- **Standardized** infrastructure deployment using Terraform (IaC), decreasing resource provisioning time and ensuring consistent environment configurations.
- **Standardized** infrastructure deployment using **Terraform (IaC)**, ensuring consistent, reproducible environment configurations across the Google Cloud ecosystem.
- **Streamlined** development lifecycles by implementing **CI/CD** pipelines to automate the testing and deployment of data workflows and cloud resources.
- **Engineered** centralized dashboards in Looker Studio and LookML to visualize key performance metrics for stakeholder decision-making.
- **Enhanced** system reliability by implementing comprehensive observability through Google Cloud Logging and Monitoring to proactively identify and resolve pipeline bottlenecks.
- Collaborate with data scientists and software engineers within an **Agile framework** to deliver data solutions.

Freelance AI Trainer / AI Training Engineer

SCALE AI (OUTLIER) **Oct 2024 – Present**

- **Refined** large language model (LLM) performance by evaluating and ranking AI-generated code across Python, Java, and C++.
- **Developed** complex technical prompts and edge-case scenarios to stress-test model reasoning and accuracy.
- **Mitigated** model risks by identifying and reporting hallucinations, ensuring 100% compliance with data privacy (POPIA/PII) and safety guidelines.
- **Validated** technical responses for factual accuracy and clarity, contributing to high-quality training data for production-level AI models.

Student Mentor

GEEKULCHA **March 2025**

- Helped students refine their ideas to meet Hackathon criteria.
- Provided students with support in code debugging.
- Online support for for virtual participants.
- Collaboration with core mentors to help manage and support multiple teams across the continent.

Trainee

AFRIKA TIKKUN SERVICES / FAITH MANGOPE TECHNOLOGY INSTITUTE **March 2024 - March 2025**

- **Completed** work-readiness and cloud technology programs covering Azure Cloud and AI.
- **Mastered** enterprise-level database management, utilizing SQL to optimize complex queries and manage relational constraints in production environments.
- **Executed** data visualization projects using Plotly, Seaborn, and Matplotlib to translate complex datasets into actionable business insights
- **Attained** 4+ industry-recognized certifications, including Azure (AZ-900) and AI Fundamentals (AI-900), within a 12-month period.
- **Developed** predictive models and algorithms for intelligent systems using Python and Java, achieving high-performance benchmarks for data handling.

EDUCATION

Diploma in IT: Intelligent Industrial Systems (NQF 6| Incomplete)

Tshwane University ofTechnology • 2019 – 2023

National Senior Certificate (Metric)

Tshivhidzo Masiagwala Secondary School • 2019-2019

CERTIFICATIONS

Google Cloud Certified Professional Data Engineer

PCAP Certified Associate Python Programmer

Oracle Certified Associate (OCA) Java SE 8 Programmer

Microsoft Certified: Azure Fundamentals (AZ-900)

Microsoft Certified: AI Fundamentals (AI-900)

SKILLS

Python , Java , SQL, C++

Google Cloud Platform (BigQuery, Cloud Storage, CloudComposer), Microsoft Azure, Terraform

ETL/ELT processes, Cloud Functions, Apache Airflow orchestration

Machine Learning, Data Labeling, Looker Studio, Power BI, Pandas, Matplotlib, Seaborn

Industrial Automation (PLC), Electronics, Mobile Robotics
